RISK MANAGEMENT AND SAFETY

Good Catch

BY SAFETY OPERATIONS TEAM

Throughout this fiscal year, we've been encouraged by the *nearly 400* Good Catch reports we received. From the minor to the major, *each* report has been a crucial step towards a safer campus environment. Whether it's been an alert about damaged sidewalks, trees that obscure visibility, lighting, building concerns, electrical issues, or more, every single report has contributed positively. Our campus is indeed a safer and better place thanks to your vigilance and willingness to take action on these safety concerns. As you continue your daily activities, we urge you to keep an eye on those small yet significant details that can make a difference and continue using the [RMS Good Catch](#) form to let us know about them.

REMEMBER, IF YOU SEE SOMETHING, SAY SOMETHING!

The Risk Management & Safety team expresses its gratitude to those individuals who took the initiative to report a good catch in June. Your attentiveness and commitment to our campus safety are genuinely appreciated.

June Supporters

- Andrew Gutierrez – Chemistry
